EnduraLite
PUNCTURE-PROOF TECHNOLOGY

BY AIRLESS TYRE TECHNOLOGIES

Reduce Downtime By Making Flat Tyres History

THE LIGHT VEHICLE DILEMMA AT MINE SITES

Brutal conditions cause constant tyre punctures and expensive vehicle downtime.

However, flatproofing with conventional foam fill is too heavy and too hard on vehicles and operators alike.

THE SOLUTION: *EnduraLite*

Flat tyres = Downtime and wasted $$

EnduraLite Eliminates Flat Tyres. Fit and Forget.

COST BENEFITS OF *EnduraLite*

TYPICAL UNDERGROUND PUNCTURE EVENT

- **Vehicle travels to workshop or fitter comes underground**
- **1- 2 Hours lost**
- **Multiple personnel involved**
- **Typical Total Cost: $1000 - $2500+**

EnduraLite **ELIMINATES ALL OF THE ABOVE**

PERFORMANCE BENEFITS OF *EnduraLite*

EnduraLite is a lightweight cellular polyurethane elastomer that replaces the air inside a pneumatic tyre, eliminating punctures without the excessive weight of conventional solid tyre fill.

- **ZERO Flat Tyres**
- **Safety – No Underground Tyre Swaps**
- **>50% Lighter than Conventional Fill**
- **No Maintenance After Installation**
- **No Tyre Downtime from Punctures**
- **Reduced Stress on Running Gear**

Ready to eliminate tyre-related downtime? Contact us to discuss an *EnduraLite* trial on an LV or UTV at your work site.
